Professional Summary

4th-year B.Tech student specializing in Artificial Intelligence and Machine Learning with strong foundations in Python, C, Data Structures & Algorithms, Machine Learning, and Deep Learning. Experienced in developing AI-powered web applications using Flask and building real-world AI solutions. Skilled in TensorFlow, NumPy, Pandas, scikit-learn, Git, and Docker. Solved 100+ LeetCode problems and achieved 4-star HackerRank ratings in Python, C, and Problem Solving (DSA).

Experience

SpanIdea Systems Pvt. Ltd., Jodhpur

May 2026 – Present

AI/ML Intern (Full-Time On-Site)

- Working on FastAPI concepts including Authentication, JWT, and backend API development.
- Working with frontend technologies like React and libraries such as CesiumJS.
- Collaborating on practical industry projects.

DreamTeam Technologies Pvt. Ltd., Jodhpur

Dec 2025 – Feb 2026

AI & DS Intern

- Developed an AI-based image understanding web application using Flask.
- Implemented authentication, chatbot integration, and database-backed image storage.
- Built intelligent image title and description generation features using AI models.

Technical Skills

Programming Languages: Python, C, C++, Java

Machine Learning & Deep Learning: Regression, Classification, Clustering, ANN, CNN, RNN, LSTM

Libraries & Frameworks: NumPy, Pandas, scikit-learn, TensorFlow, Flask, FastAPI, Matplotlib, LangChain

Web Development: HTML, CSS, JavaScript, Flask, React

Tools & Platforms: Git, GitHub, Docker, MySQL, Google Colab, Kaggle, VS Code, Excel

Projects

Flask-Based ML Model Explorer with Authentication

- Designed and developed a secure platform to learn and test Machine Learning models.
- Integrated TensorFlow models trained using Google Colab.
- Added authentication system and interactive prediction dashboard.

Agrisense - Crop Disease Detection System

- Developed a CNN-based AI system for crop disease detection using image analysis.
- Integrated AI-powered chatbot support with speech interaction for farmers.

- Technologies Used: TensorFlow, Keras, Flask, Python, NumPy, Pandas.

AI Image Understanding Application

- Built an intelligent web application capable of generating image titles and descriptions.
- Implemented user authentication and database-backed image management.
- Developed responsive frontend and chatbot integration features.

Achievements & Certifications

- Solved **100+** problems on **LeetCode**.
- Achieved **4-Star HackerRank** ratings in Python, C, and Problem Solving (DSA).
- Cleared **TCS CodeVita Season 12 Round 1**.
- Earned **62 Badges and 12 Trophies** in Microsoft Azure AI Training.
- Completed certifications in Mathematics for Machine Learning and Introduction to Machine Learning.
- Achieved **100/100 in Mathematics** in both Class 10th and 12th.

Education

Jodhpur Institute of Engineering and Technology
B.Tech in Artificial Intelligence and Machine Learning
CGPA: 9.5

2023 – 2027

K. S. Public Sr. Sec. School
Senior Secondary Education
Percentage: 94.2%

2022
